- Computer Architecture

PROJECTS

Amazon Clone Website [↗](#) | HTML, CSS

Jun 2025

- Developed a static clone of the Amazon website with homepage, product listings, and navigation bar using semantic HTML.
- Designed and styled UI components with CSS, ensuring responsive layouts across devices.
- Strengthened front-end development skills by replicating real-world e-commerce website structure and design.

Personal Portfolio Website [↗](#) | HTML, CSS, JavaScript

Aug 2025

- Developed a responsive personal portfolio website to showcase projects, technical skills, and contact details.
- Implemented dynamic functionality and interactive features using JavaScript to improve user experience.
- Applied semantic HTML and modular CSS for clean structure, maintainability, and cross-device compatibility.
